

Are YOU thinking what I am thinking?
All the sudden, this does not look like a very good idea
as we are trying to stop spreading germs!

Therefore, we have made accommodations
to our water stations at MLP!

- 1- The mouth spout pieces have been covered on the water fountains that have the new bottle filling function.
- 2- Students are encouraged to bring their own reusable water bottle to school to be environmentally friendly!
- 3- If you don't have a water bottle, please use the plastic cups and trash cans that have been placed at all fountains.

Grab a cup and fill it up!

Thank you for following our new water fountain procedures!
